Assembly Power & Quality Control

World-Class CKD Assembly Infrastructure

Complete Knock-Down (CKD) Capability: Full Assembly from Component Level

- ✓ **4 Automated Assembly Lines** — With SMT mounting and full automation capabilities
- ✓ **4 Certified Class Clean Rooms** — For sensitive component handling and quality control
- ✓ **Advanced Testing Labs** — 100% quality inspection with automated optical inspection (AOI)
- ✓ **Technical Capabilities** — Advanced assembly lines ensure quality and efficiency.
- ✓ **Local Manufacturing** — Plastic casings, packaging materials, and accessories produced locally

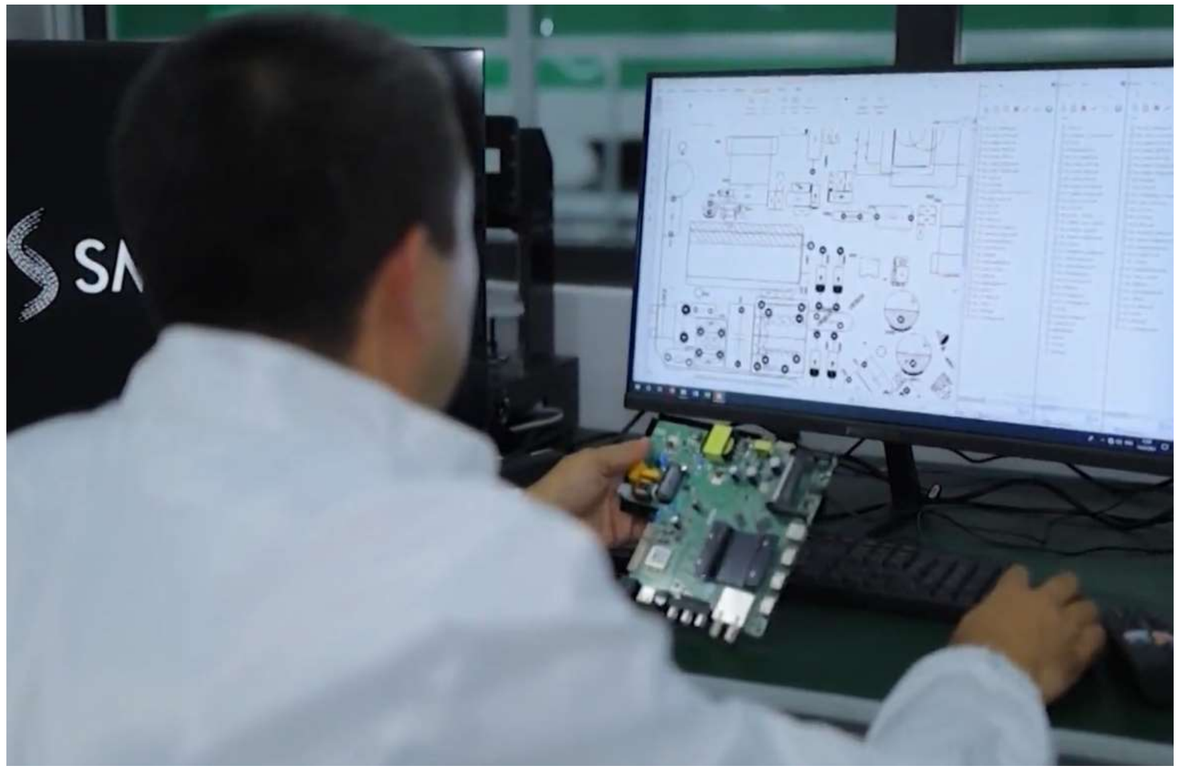

500,000 units per year

Our facility boasts an impressive assembly capacity of **500,000 units per year**, enabling us to meet the demands of global partners effectively and efficiently.

Zero-Defect Commitment Backed by Global Standards

6-Stage Quality Control

1. Incoming Inspection
2. In-Process Testing
3. Burn-in Testing
4. Final Inspection
5. Packaging QC
6. Pre-Shipment Audit

Defect Rate: <0.3% (Industry: 1-2%)

EXPORT GEOGRAPHY

COMPETITIVE ADVANTAGE

COMPETITIVE ADVANTAGES

Competitive Edge

Labor Costs

Lower expenses due to competitive labor rates.

Energy Costs

Reduced overhead from low industrial energy prices.

Training Programs

Skilled workforce through technical training initiatives.

Governmental & Fiscal Aid

Tax Exemptions

Tax on profits are exempt from taxes

Customs Preferences

Benefits on component imports. Zero duty mode for export oriented goods.

Special Economic Zones

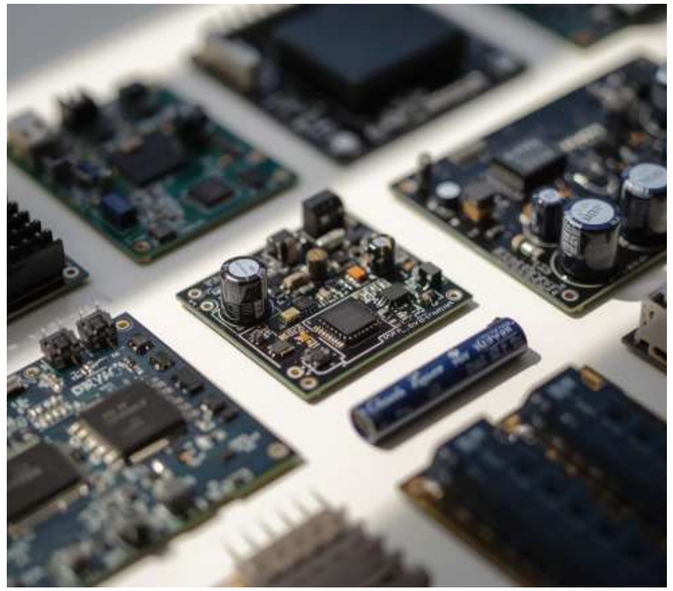

Streamlined administration enhances manufacturing efficiency

Localization Benefits

Local Sourcing

High quality components sourced nearby for efficiency

Flexible Customization

Products tailored to meet partner specifications effectively

Strategic Partnerships

Collaborations with local suppliers enhance efficiency

Authorised Economic Operator (AEO) status is an internationally recognized quality mark indicating a business's role in the international supply chain is secure and compliant with customs controls. Issued by customs authorities, it provides benefits like faster shipments, reduced risk scores, and simplified procedures, enhancing trust in trade.

Risk Reduction

Supply Chain

Local assembly minimizes disruptions and delays.

Quality Assurance

Adherence to international safety standards ensured.

Government Support

Strong backing reduces regulatory risks significantly.

Profit Margins & Growth

Cost Efficiency

Lower operational costs increase profit margins significantly.

Time-to-Market

Faster product delivery enhances competitive advantage.

Scalability

Flexible production lines adapt to market demands.

Why SSMART?

Modern Facility

State-of-the-art assembly lines with scalability.

High Capacity

Significant annual output supporting global standards.

Quality Assurance

Rigorous testing processes ensuring product excellence.
